Capability statement

Xeenie Group Ltd, a mechanical and electrical contractor based in Halifax, working on industrial, pharmaceutical, logistics, water and food sites across the UK.

2021 Founded	**5** Sectors we work in	**44** Chargers fitted for CHEP	**0** Safety incidents across 5 sites

Who we are

We install and look after the electrical and mechanical systems that keep industrial sites running, from the first drawings through to testing and commissioning. Most of our work is electrical installation, EV charging included. We build control panels, make conveyors to order and fit EV and fleet charging, then look after it all with planned maintenance and breakdown support.

Sectors

- Logistics
- Pharmaceutical
- Manufacturing
- Water
- Food and beverage

What we do

- **Electrical installation**
  We plan, install, test and commission commercial and industrial electrical systems.
- **Conveyor systems**
  We design, install and maintain conveyor systems, each one built to order.
- **EV and fleet charging**
  We design and install charging for electric forklifts and fleet vehicles.
- **Service and maintenance**
  We look after your systems with planned maintenance and breakdown support.
- **Control systems**
  We take control systems from PLC programming through to full system integration.
- **Commissioning and Validation**
  We carry out IQ and OQ validation, HEPA filter and pressure decay testing.

CHEP fleet charging

CHEP chose us as its preferred contractor for the EV charging infrastructure behind its move to an electric fleet. At Pontefract, Durham and Severnside we installed and commissioned standalone 30kW chargers with the groundworks, the power kiosks and the containment. The work now covers 5 UK sites and 44 chargers, with 0 safety incidents.
